We are very much pleased with the management of Mr. and Mrs. Clement, from the appearance of the foregoing account, and also from the appearance of every thing about the farm and buildings, and have agreed to pay them \$215 00 for another year.

The average number of poor at almshouse the past year has been about 12; nine have been admitted and one has been discharged. The number at present is 17, as follows:—

Eliphalet Hills,	very infirm, aged	95
W. D. Elizabeth Blodgett,	“ “	88
Jacob Blodgett, works a little,	“	73
Josiah Hamblet, able to labor some,	“	58
Thomas Harris, “ “ “	“	54
Mrs. W. H. Smith,	“	41
Mary A. Smith,	“	14 months
Noah R. Proctor, able to labor,	“	36
Aaron Hamblet,	“	8
James Corliss, able to labor some,	“	51
Sarah H. Corliss, able to labor,	“	34
Sarah A. Corliss,	“	10
Rebecca J. Corliss,	“	7
Chastina A. Corliss,	“	5
Austin Corliss,	“	3
Alonzo Corliss,	“	10 months
James Greeley,	“	10

JAMES PIERCE,	} Overseers of the Poor.
GEO. H. BURNS,	
GEO. W. HILLS,	

R E P O R T

OF THE

SUPERINTENDING SCHOOL COMMITTEE.

The Superintending School Committee have attended to the duties assigned them, and submit the following report :—

The return of this period reminds us not only of the flight of time, but of our obligations to the Sovereign Ruler of the universe. Whatever may be their character, our labors must soon terminate.

We are not unmindful of the grave responsibilities with which we have been entrusted. As all the subjects of the Divine government on earth are preparing for a harvest which will bear an intimate relation to the moral seed which they sowed, those who are charged with the education of our youth must share largely in the responsibilities of life.

In a country like ours, Common Schools must occupy an important place. As a large majority of our citizens must receive the most of their education in these schools, they will have an extensive influence in moulding the character and shaping the destiny of our country.

The character and welfare of the nation must be closely connected with the Sabbath, the Bible and the Common School. Some of the youngest children who are now in a process of education, will soon be Legislators and the Executors of our laws.

The history of our schools, the past year, is probably familiar to many of the citizens. The past year, in most respects, has been like preceding years. Our schools have been subjected to those vicissitudes to which almost every thing is here exposed. In some districts, there has scarcely been an unpleasant occurrence. Harmony has marked their course and success has crowned their efforts. In other districts, diversified causes have produced results that

are more unfavorable. In some cases teachers may have failed to exercise discrimination and wisdom. A thorough knowledge of human nature is a qualification in a teacher that is very desirable. Those who have made considerable attainment in this department of knowledge, are usually distinguished for aptness in its acquisition. The Committee may have an opinion of the qualification of a teacher in this respect, and yet they are neither required nor expected to make this an essential element in the conclusion to which they arrive, as the result of an examination.— This duty devolves on the Prudential Committee, who is supposed, in this respect, to have passed judgment on a teacher previous to any examination by the Superintending Committee. Strict attention to this would remedy an existing evil. But in general our teachers the past year have been as unexceptionable as in any previous year within our recollection.

In the examination of teachers and in the general supervision of the schools, having endeavored to discharge our duty as prescribed by the laws of the State, we submit the results. Without claiming perfection for any of our labors, we enjoy the happiness that flows from a consciousness of having attempted to do our duty.

There are a few considerations of a more specific nature, to which your attention is solicited.

ORDER. As a whole, the order of the schools the past year will bear comparison with any previous year of our official labors. In some instances it has been far above mediocrity; and yet there have been cases of defect. Our young teachers frequently come to us with views of discipline that are unsound and impracticable; and there are cases in which the most faithful instruction and admonition fail to accomplish any good results.— While they treat us respectfully, and listen attentively to all that we have to say, it is apparent that they do not appreciate it or even believe it. But they usually learn from bitter experience what they failed to learn from the friendly counsels of their supervisors.

MORAL PURITY. The standard of morals in the schools is too low. In our labors with the teachers and scholars, this has not been overlooked; but there is much room for improvement. The great principles of piety and virtue should be daily impressed on the minds of the young.— Divorce Christianity from our schools, and you have deprived them of their crowning excellency. God will honor those who honor Him, and despise those who lightly

esteem Him. No plea is here attempted for sectarianism—but no apology is offered for infidelity. Its theory is repulsive—its influence is blighting and corrupting.

Children are under the moulding influence not only to their teachers, but of their playmates; nor is this influence confined to the school-room; but is imparted in the streets. One vicious pupil may corrupt the greater part of the entire school.

THOROUGHNESS.—The want of thoroughness is a defect discoverable in the most of our schools. On the part of many pupils, there is a strong propensity to leave first principles, before they are thoroughly mastered. They seem to calculate their success by the amount of surface over which they pass. This is apparent in every branch of study, but in none is it more so than in reading. Special attention to this evil has produced a favorable result, but it has not removed it. The art of reading well is desirable, and there is but one way of attaining it. Special attention must be given to first principles. Pupils must be subjected to rigid drilling in those principles until they become habitual. There is not too much time spent in reading, but the scholars go over too much surface in a limited time.

CHANGE OF TEACHERS. This is an evil that needs special attention. Change of teachers nearly every term must necessarily lead to bad results. Time is necessary for a teacher to become acquainted with the dispositions, habits, mental capacities, and attainments of scholars; and time is also necessary for the scholars to become familiar with the mental structure and habits of the teacher.

If pupils are subjected to rigid habits of thought, and are trained in first principles until there is a thorough mastery of them, there is no practical utility of going over the same ground every term. But there are those in our schools, who have gone over nearly the same surface every successive term for several years. They have not grappled with new principles and advanced studies. Every successive teacher has felt a difficulty in commencing at any *advanced* point.

But if the same teacher could be employed term after term, this arrangement with thoroughness would remove the difficulty. It is frequently practicable and advisable to employ the same teacher in summer and winter. It is reasonable to suppose that a well disciplined lady-like; high-minded and experienced female would be better adapted even to a Winter school, than a *mere boy*, what-

ever might be his physical proportions. The schools that have been under the instruction of females the past Winter, are a good illustration of the point under consideration.

SCHOOL HOUSES. In regard to these we are happy to report progress. The community appears to be awaking to a more just view of the importance of School architecture. But much remains to be done. In District No. 2, the house is inconvenient in several respects. In District No. 4, the scholars are not accommodated with room; the house being too small both for convenience and health.—In District No. 6, the old school-house has given place to a new and commodious one, which is very creditable to the district.

The following is a list of books recommended :—
